DISTRIBUTED STORAGE

StorPool Storage - Agile Storage Platform for Managed Services Providers

The ideal foundation for cloud infrastructure serving the primary workloads of SMBs and Enterprises.

Build powerful and robust clouds for your users

Retain control over your cloud infrastructure and ease the load on your people

Simplify your cloud Infrastructure and streamline your IT operations

The ideal foundation for cloud infrastructure serving the primary workloads of SMBs and Enterprises.

StorPool accelerates the world by storing data more productively and helping businesses achieve their goals. Public and private cloud builders like MSPs and CSPs use StorPool Storage as their clouds' foundation.

StorPool Storage helps you get your data in order. It enables you to deploy and grow reliable, agile, speedy, and cost-effective clouds that meet the needs of your customers.

Architect

We help you select the ideal architecture for your cloud at the physical, network, and logical levels, using only standard hardware.

Deploy

We install StorPool Storage in your servers and connect your storage system to one or more Cloud Management Platforms.

Fine-Tune

We analyse and tune your StorPool Storage system so that it runs optimally and reliably for your customers' workloads.

Monitor

We monitor hundreds of metrics per second to proactively open support tickets and deal with any issues that arise.

Maintain

We ensure that your storage system always runs optimally by installing non-disruptive updates and adding servers when needed.

StorPool's Enhanced Offerings for Managed Services Providers

StorPool Storage provides a primary storage platform for MSPs building clouds that run mission-critical workloads.

StorPool's enhanced offering is ideal for MSPs using their own cloud infrastructures to serve the primary workloads of their end customers. The complete solution is the perfect foundation for building efficient clouds with a simple architecture and managing resources more effectively.

StorPool has extensive data management features in the areas of performance, reliability, space saving, plus built-in backup and DR (Disaster Recovery) functionalities. Furthermore, it has multi-stack support (both software and hardware-wise). This makes StorPool the leading data storage platform to power hybrid- and multi-cloud efforts at scale.

Flexible and Functional, just like your business!

StorPool Storage helps you get your data in order. It enables you to deploy and grow reliable, agile, speedy, and cost-effective clouds that meet the needs of your users.

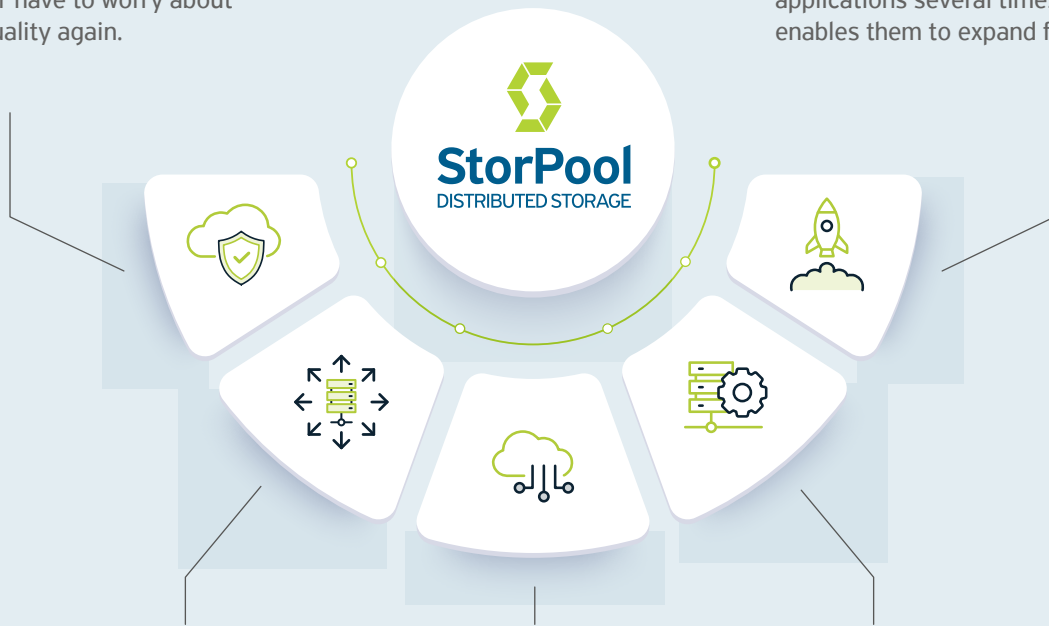

StorPool is the easiest way to convert sets of standard servers into primary storage systems for large-scale cloud infrastructure. The software comes as an utterly hands-off solution - StorPool's team architects, deploys, tunes, monitors, and maintains each StorPool Storage system so that end-users experience speedy and reliable services.

“Our MSP customers chose StorPool because it aligns well with their business operations. They understand the value of offloading heavy IT tasks because that's what they do for their own customers. We do the same thing for them with data storage, allowing MSPs to focus on delivering higher-order value to their customers.” — Alex Ivanov, Product Lead at StorPool Storage

Reliable: an enterprise-grade solution that brings their cloud's reliability to a whole new level, so they never have to worry about service quality again.

Speedy: as the fastest feature-rich storage platform on the market, StorPool accelerates our partners' applications several times and enables them to expand faster.

Agile: they leverage multiple storage tiers to deliver services that meet the needs of all their use cases while scaling from single-app systems to multi-data-centre deployments.

Multi-Hypervisor Support: by connecting a single StorPool storage system to all their cloud platforms, our partners streamline their entire IT operations.

Utterly Hands-off: our storage experts ensure that end-users experience fast and reliable services so our partners' teams have time for the projects that aim to grow their business.

What does your business get with StorPool?

Modern MSPs companies need the flexibility and the freedom they get from choosing the right IT solutions. Migrating to an evolved storage platform helps them minimise complexity and create opportunities they never knew existed.

Pricing Model Designed for Growing MSPs

Bring your data home using the technologies you need and pay as you grow – with no fixed term commitments.

- Rigid pricing models are a thing of the past. Companies offering managed services can benefit from a flexible pricing system that accommodates their needs and the specifics of their use cases, selected hardware, and requirements.
- StorPool partners typically offer tailored, managed solutions – managed private clouds, virtual private clouds, database as a service, desktop as a service, hosting of ERP/CRM/SCM software, etc. As MSPs store more data with StorPool, they receive volume discounts on their base price per TB per month, meaning they can either increase their profit margins or optimize their prices for end customers.

Regain Control

Separate your investments in hardware from the fees for the software needed to run it.

Prepare for Growth

Buy the hardware needed to meet long-term needs while keeping software costs low.

StorPool's pricing is a flexible system based on the pay-as-you-grow model and is calculated based on used storage capacity, use case, and requirements.

Packed with many valuable features and outstanding support, StorPool Storage enables MSPs, cloud builders and other service providers to improve the quality of their services, retain and grow their customer base, and win new markets.

General inputs for the pricing forecast for Managed Services Providers

Use Case

Migration to cloud management platform integrated with StorPool

System type

Primary or secondary storage for virtualization workloads (VMs, VPS, etc.)

Storage Media

Storage drives, system hardware

Initial Capacity

Starting used storage capacity in the first month

Year 1 Growth

Prediction of monthly growth rate over Year 1

Year 2 and On

Prediction of monthly growth rate from Year 2 and on

What our Partners Say about StorPool

The StorPool product is perfect from both a technical and performance point of view. Second - and for us equally important - is the way StorPool help us to build the most advanced hosting platform and their fast and committed support in case of an issue.
